Dear Hiring Manager,

I am writing to express my interest in the Data Analyst position. Your need for interactive dashboards, rigorous data validation, and reliable reporting aligns closely with my background in R, Python, Shiny, statistical analysis, and geospatial visualization.

In my current role at the University of Houston, I developed an R Shiny application for data ingestion and variable type handling, which improved workflow efficiency and reduced manual effort for users. I also created geospatial visualizations in QGIS to map demand patterns across different areas, an experience that aligns well with analyzing trends, service gaps, and geographic disparities. In addition, my work has required careful attention to data structure, consistency, and reproducible analysis.

Previously, at Amazon, I prepared shift-close reports for management and used operational data to identify bottlenecks and improve performance while maintaining service standards. That experience strengthened my ability to work with reporting timelines, present results clearly, and support data-informed decision-making in a fast-paced environment. My research experience has also reinforced disciplined data collection, documentation, and dissemination of findings to technical and non-technical audiences.

I would welcome the opportunity to bring my analytical skills, attention to detail, and commitment to accurate reporting to your team. Thank you for your time and consideration. I look forward to the opportunity to discuss my qualifications further.

Sincerely,
Tingwei Adeck
