Tingwei Adeck

tingwei_adeck@brown.edu | (816) 562-2583 | www.linkedin.com/in/tingwei-adeck

EDUCATION

Brown University, RI **Expected August 2026**
ScM Biostatistics and Health Data Science GPA: 3.6/4.0
Relevant Coursework: R Programming, Statistical Inference, Causal Inference, Machine Learning, Artificial Intelligence

University of Missouri, Kansas City , Missouri **Dec 2022**
Master of Science in Cell and Molecular Biology GPA: 3.33/4.0

SKILLS

- Languages: R, Python, SQL, HTML, CSS, Javascript
- Tools: Git, Docker, Rstudio, Positron, Shiny, Streamlit, Flask, MongoDB
- Concepts & Methodologies: Data Structures and Algorithms, Statistical Programming, Data mining, Data wrangling, Data strategy, and Machine Learning

WORK EXPERIENCE

University of Houston **May 2025 - Dec 2025**
Energy Transition Data Science Intern

- Developed an interactive R Shiny app "DataAnal" to ingest and wrangle large data sets that were used to deliver actionable insights to policymakers and energy stakeholders, enabling real-time monitoring of KPIs like carbon intensity, peak usage, and renewable integration. Reduced data wrangling time by 5%.
- Collaborated with cross-functional teams to evaluate the impact of energy efficiency programs, applying statistical learning models (GLMs, Decision Trees) to quantify savings and behavioral shifts.
- Built geospatial visualizations using QGIS by integrating satellite and Alternative Energy Fuel Stations data to map energy demand patterns across residential, commercial, and industrial zones.

Amazon Inc, Seattle **October 2022 – December 2023**
Pick Area Manager

- Led package dispatch operations, ensuring smooth coordination between fulfillment processes and outbound logistics while adhering to Service Level Agreements (SLAs).
- Implemented process improvements to enhance productivity, reduce bottlenecks, and maintain high safety and operational standards. Developed an excel sheet that helped improve the pick rate by 3% in line with safety standards.

ADDITIONAL EXPERIENCE

University of Missouri Kansas City **August 2020 - December 2022**
Graduate Research Assistant

- Performed research in the lab of Dr. Wang, on liposome flux assays; a high throughput system for drug screening.
- Developed the protocol based on existing literature from a renowned researcher in the field known as Roderick MacKinnon, as directed by the Principal Investigator (PI).
- Performed the wet lab experiments as directed by the PI, performed data analysis on data sets obtained from the experiments and presented the results of research findings to faculty, staff and peers in research seminars at the institution.
- Communicated results from various lab projects in a series of seminars at the Graduate school.

PROJECTS

Normfluodbf (Analytic Tool for Liposome Flux Assays)

- An R Package and demo shiny app for the analysis and visualization of data from liposome flux assays.
- The package provides a modular data analysis pipeline for importing data, analyzing data and visualizing data.
- Reduced the time for analyzing data from this assay type by almost 90%.

TidyDenovix (Analytic Tool for Spectrophotometry)

- An R Package for the analysis of data from the Denovix DS family of spectrophotometers.
- Utilization of the tidyVerse in R for the creation of packages.

Randvar (R shiny app for statistical distribution exploration)

- An R Shiny App for the exploration of statistical distribution types.
- Utilized R's shiny framework to build a web app used in the exploration of statistical distribution types.

Courselamb (Streamlit app for querying large language models)

- A python streamlit app for querying large language models (gemini, openai etc.).
- Front-end and back-end prototyping on Python's streamlit.
- Demo login page for testing and understanding authentication protocols.
