EXECUTIVE SUMMARY

Data Scientist and Tech Enthusiast with 2+ years of experience building data software solutions in languages like R and python that have served over 1000 people.
Developer of 2 R packages normfluodbf and tidyDenovix that have over 3000 downloads combined. 2 Python packages developed on the concepts of Image manipulation and Machine Learning; utilizing libraries like Pillow, OpenCV, pandas, and numpy.
Currently, I serve as an Energy Transition Data Science Intern at the University of Houston, where I apply statistical modeling, geospatial analysis, and machine learning to support research on clean energy adoption, grid modernization, and decarbonization strategies.

EXPERIENCE

UNIVERSITY OF HOUSTON

DATA SCIENCE ENERGY TRANSTION INTERN

Houston, Texas — 2025 – 2026

· Developed an interactive R Shiny app "DataAnal" to ingest and wrangle large data sets that were used to deliver actionable insights to policymakers and energy stakeholders, enabling real-time monitoring of KPIs like carbon intensity, peak usage, and renewable integration.
· Collaborated with cross-functional teams to evaluate the impact of energy efficiency programs, applying statistical learning models (GLMs, Decision Trees) to quantify savings and behavioral shifts.
· Built geospatial visualizations using QGIS by integrating satellite and Alternative Energy Fuel Stations data to map energy demand patterns across residential, commercial, and industrial zones.

AMAZON INC.

AREA MANAGER FULFILLMENT CENTER

Gardner, Kansas — 2022 – 2024

· Led package dispatch operations, ensuring smooth coordination between fulfillment processes and outbound logistics while adhering to Service Level Agreements (SLAs).
· Oversaw order fulfillment operations, ensuring accurate sorting, staging, and processing of customer packages to meet performance and quality standards.
· Implemented process improvements to enhance productivity, reduce bottlenecks, and maintain high safety and operational standards.
 / 

UNIVERSITY OF MISSOURI KANSAS CITY

GRADUATE RESEARCH ASSISTANT

Kansas City, Missouri — 2020 – 2022

· Performed research in the lab of Dr. Wang, on liposome flux assays; a high throughput system for drug screening.
· Developed the protocol based on existing literature from a renowned researcher in the field known as Roderick MacKinnon, as directed by the Principal Investigator (PI).
· Performed the wet lab experiments as directed by the PI, performed data analysis on data sets obtained from the experiments and presented the results of research findings to faculty, staff and peers in research seminars at the institution.

EDUCATION

BROWN UNIVERSITY

SCM BIOSTATISTICS HEALTH DATA SCIENCE

Providence, Rhode Island

2025 – 2026

- Currently studying Biostatistics and Health Data Science.

UNIVERSITY OF MISSOURI KANSAS CITY

BIOLOGY/BIOINFORMATICS

Kansas City, Missouri

2019 – 2022

- Performed graduate PhD research in the fields of Chronobiology, Plant Biology, Electrophysiology and Microbiology in the Price, May, Wang and Oconnor labs.
- Earned a Masters of Science in Cell and Molecular Biology.

WEST TEXAS A & M UNIVERSITY

BIOLOGY/CHRONOBIOLOGY/BUSINESS

Canyon, Texas

2015 – 2018

- Earned a BS degree in Biology with research emphasis on chronobiology.

PROJECTS

Normfluodbf

- An R Package and demo shiny app for the analysis and visualization of data from liposome flux assays.
- The package provides a modular data analysis pipeline for importing data, analyzing data and visualizing data.

TidyDenovix

- An R Package for the analysis of data from the Denovix DS family of spectrophotometers.
- Utilization of the tidyVerse in R for the creation of packages.

RandVar

- An R Shiny App for the exploration of statistical distribution types.
- Utilized R's shiny framework to build a web app used in the exploration of statistical distribution types.
